SUMMARY

Full Stack Developer with expertise in Java, Spring Boot, and Angular, specializing in building robust full stack solutions and delivering efficient RESTful APIs. Experienced in AI model evaluation and optimization, contributing to enhancements in AI reasoning for industry applications. Proven success in implementing CI/CD pipelines and enhancing system reliability within Agile environments. Committed to leveraging skills in both full stack development and AI insights to innovate and contribute to dynamic software engineering challenges.

EXPERIENCE

Backend Software Engineer

November 2025 - Present
Mercor San Francisco, CA, United States

- Built Go benchmarks for AI/ML code-gen models; curated real-world tasks, deterministic runners, and golden tests for reproducible pass@k improved benchmark fidelity.
- Partnered with ML researchers to encode failure modes; added adversarial unit/integration tests and used ``-race`/`pprof`` to debug model outputs reduced flaky failures.
- Shipped scalable tooling/CI for training/inference loops (Go CLI, metadata, Docker, GitHub Actions); enforced linting and style consistency accelerated model evaluation.
- Authored evaluation protocols/docs; reviewed AI/ML outputs and PRs; applied bootstrap CIs/A/B tests to track reliability data driven model insights.

AI Research Engineer

Oct 2025 - Present
Handshake AI Solutions, LLC San Francisco, CA, United States

- Collaborated on Project Canary with AI researchers to enhance LLM performance in Computer Science through testing, evaluation, and optimization, focusing on reasoning capabilities.
- Assessed and refined model responses for accuracy and reliability, meeting benchmarks including 70% task approval rate and efficient timelines.
- Delivered original research outputs in a remote setting, adhering to IP, confidentiality, and MOVE Program guidelines (e.g., no LLM usage) to advance AI reasoning and comprehension.
- Engaged in milestone-based tasks, contributing to AI system development in Computer Science, emphasizing inference and prompting techniques for complex challenges.

Software Engineer

Jul 2024 - Aug 2025
INV Software Solutions LLC Pearland, TX, United States

- Developed full-stack responsive web application using Angular frontend, Java and Spring Boot backend with SQL databases; deployed on AWS S3 for scalable static hosting and optimized via CloudFront for enhanced performance and accessibility.
- Designed CI/CD pipeline with GitHub Actions to automate builds, deployments, and testing, reducing deployment time and supporting rapid feature delivery.
- Configured AWS IAM with least-privilege policies for secure S3 access; implemented security practices including encryption, access controls, and vulnerability scanning to minimize risks.
- Collaborated with cross-functional teams on integrations and updates; supported multi-threaded Java infrastructure, wrote Shell automation scripts, and ensured reliability through unit/integration testing frameworks.

Associate Software Engineer

Aug 2022 - Aug 2023
Nisum Technologies, Inc. Hyderabad, Telangana, India

- Completed full-stack training in Java, Spring Boot, Angular, React, Selenium, Kafka, Docker, Kubernetes, MySQL, AWS, JUnit, Mockito, and Microservices; applied TDD and Agile Scrum methodologies in cross-functional teams.
- Developed frontend (Angular/React) and backend (Java/Spring Boot) systems with clean coding, GitLab version control, JSON handling via Jackson/Gson, and Elasticsearch for real-time search in RESTful APIs.
- Implemented testing strategies using JUnit, Mockito, and Karma; managed CI/CD pipelines in GitLab for automated builds, tests, and deployments.
- Troubleshoot issues by analyzing server logs, collaborated with QA and teams to resolve JIRA tickets, maintained technical documentation, and adapted to tools like IBM Sterling OMS for efficient project delivery.

Software Development intern

Jun 2019 - Jul 2019
Gudluri Venu Software India Private Limited Hyderabad, Telangana, India

- Developed web application modules using Angular and JavaScript, including a shopping cart feature, improving coding efficiency by 25% and integrating it into production environments.
- Authored technical documentation for order processing and inventory modules, reducing onboarding time by 10 hours and enhancing knowledge sharing within the team.
- Collaborated in Agile processes, leveraging Git for version control and participating in daily stand-ups, sprint planning, and code reviews to ensure consistent development workflows.
- Enhanced UI/UX for payment gateway integrations and conducted basic testing with GitHub for bug tracking, reducing project delivery timelines by 20% and improving software reliability.

EDUCATION

Master of Science - Computer Science

Aug 2023 - May 2025
Roosevelt University

Bachelor of Technology (B.Tech) - Computer Science and Engineering (CSE)

Jul 2017 - Mar 2022
Jawaharlal Nehru Technological University Hyderabad

SKILLS

Programming Languages Java, Python, TypeScript, JavaScript, C, C#, R, Golang, C++

Web Technologies HTML, CSS, Node.js, Angular, XML, JSON, Rest APIs, Fast APIs, WordPress, React, Next.js, Vue.js, Flutter, UI/UX Design, AJAX, XSLT, GraphQL, ProtoBuf

Frameworks & Servers Spring, Hibernate, Microservices, JPA, Maven, JDBC, Design Patterns, Apache Tomcat, JBoss, Kafka, Flask, Django, OpenShift, Spark, Gradle

Databases MySQL, DynamoDB, Firebase, Elasticsearch, ETL, ELT, Big Data, PostgreSQL, NoSQL, Relational Databases, Microsoft SQL, Cassandra, Redis, Snowflake, Mongo DB, Oracle DB

Machine Learning & Data Science AWS Educate Machine Learning Foundation, Machine Learning (supervised & unsupervised), Deep Learning, Artificial Intelligence, Amazon SageMaker, PyTorch, Scikit-learn, TensorFlow, Pandas, Matplotlib, NumPy, AI Model Evaluation and Optimization, Research and Development in AI

Cloud & DevOps AWS (CloudWatch, CodeDeploy, EC2, S3, IAM, Route 53, CloudFront, Certificate Manager), Google Cloud Platform, Azure, Docker, Kubernetes, Jenkins, CI/CD, Git, GitHub, GitLab, Github Copilot, Github Actions, Ansible, Chef, Puppet

Testing & Development Tools JUnit5, Mockito, Karma, Postman, Jira, IntelliJ IDEA, VS Code, Microsoft Office, Linux, Windows, Mac OS

Project Management & Systems Agile (Scrum), Software Development Life Cycle, Waterfall Model, Hybrid Models, ERD, IBM Sterling OMS tool, Confluence

Data Streaming AWS SQS, AWS Kinesis

Security Secure Coding, Web Application Security, DevSecOps, Authentication, Authorization, Encryption, JWT, SSL/TLS, Web Service Proxies, SAML 2.0, OpenID Connect, OAuth 2.0

General Skills Data Structures and Algorithms (DSA), System Design, Innovative thinking, Critical analysis, Multi-Tasking, Flexibility, Debugging, Distributed Systems, Formal Communication and Teamwork, Critical Reasoning and Analysis

CERTIFICATIONS

AWS Educate Machine Learning Foundations **August - 2025**

J.P. Morgan - Software Engineering Job Simulation **June - 2025**

Wells Fargo - Software Engineering Job Simulation **June - 2025**

Deloitte - Technology Job Simulation **June - 2025**

PROJECTS

INV Software Solutions - Corporate Website <https://invsoftwaresolutions.com/> **Oct 2024 - Mar 2025**

INV Software Solutions, Pearland, TX, United States

- Developed and deployed a responsive Angular frontend with Java backend, hosted on AWS EC2 for compute and S3 for secure static storage; integrated external domain via Route 53 for scalable DNS management.
- Automated CI/CD pipelines using GitHub Actions for S3/EC2 deployments, incorporating AWS CloudFront CDN to cut global load times by 25%.
- Secured high-traffic apps by implementing AWS ACM for SSL/TLS, least-privilege IAM, vulnerability scans, and secure coding in Angular/Java, reducing risks by 15%.

Williams Sonoma Order Management System (OMS)

Jan 2023 - Aug 2023
Nisum Technologies, Inc., Hyderabad, Telangana, India

- Provided backend support for OMS, including custom enhancements, issue resolution, and production maintenance using IBM Sterling OMS and Java 8.
- Integrated Oracle Database with OMS via built-in and custom APIs; managed XML data flows for accurate system transformations.
- Analyzed JBoss server logs to identify and fix backend issues, developed test cases, resolved JIRA tickets, and ensured system stability
- Updated technical documentation for customizations, workflows, and troubleshooting processes.

N-Cart: Nisum Internal E-Commerce Project

Oct 2022 - Dec 2022
Nisum Technologies, Inc., Hyderabad, Telangana, India

- Designed and implemented full-stack modules for catalog management, order processing, and order history using Angular, React, TypeScript, HTML, CSS for frontend, and Java Spring Boot for backend with REST APIs.
- Integrated MySQL and MongoDB for data storage, leveraging Hibernate ORM for persistence and Elasticsearch for real-time search and analytics; handled JSON serialization/deserialization with Jackson and Gson.
- Applied TDD with JUnit, Mockito for backend and Karma for frontend testing; managed code via GitLab with CI/CD pipelines, deploying containerized services to AWS using Docker and Kubernetes in Agile Scrum sprints.
- Contributed to technical documentation and ensured scalable, performant architecture through optimized data strategies and collaborative reviews.
